About Me

I am a highly motivated and driven individual with a background in software development, architecture and tourism. I am 23 years old and always strive to challenge myself and continuously improve my skills. I am well-versed in software development and programming environments like frontend web development, backend core understanding and have experience in software architecture. I have a good understanding of the tourism industry and possess excellent customer service skills. I am a social person who enjoys participating in social activities such as social media and social events which gives me the opportunity to connect with others and expand my network. I believe my diverse background has given me a unique perspective and has helped me to become a well-rounded individual.
